REQUIRED EMPLOYEE CRUD WITH A LIST
FRAMEWORK/LANGUAGE: C++ USING QT

Collect the following employee details;

1. Employee Name
2. Employee Enroll Number
3. Date Of Birth
4. Employee Age
5. Joined Date
6. Basic Salary
7. LPA (Display only)

Validating criteria;

Employee Name
- Not more than 15 letters and not less than 3 letters.

Employee Enroll Number
- Required 6 letters.

Date Of Birth
- Employee date of birth.

Employee Age
- Auto calculate age based on DOB.

Joined Date
- Not less than 18 years.

Basic Salary
- Not less than 10,000 rupees.

LPA
- Calculate Salary * 12 = LPA.

- Hold collected employee details on a list/array. (no need to communicate with the database)
- Need export button to write available employee details to employee.json file.

Good luck with your assignment.
- Thank you.
